

BRODDSON NORDIC

## Our bestselling sweeper that gets the job done!

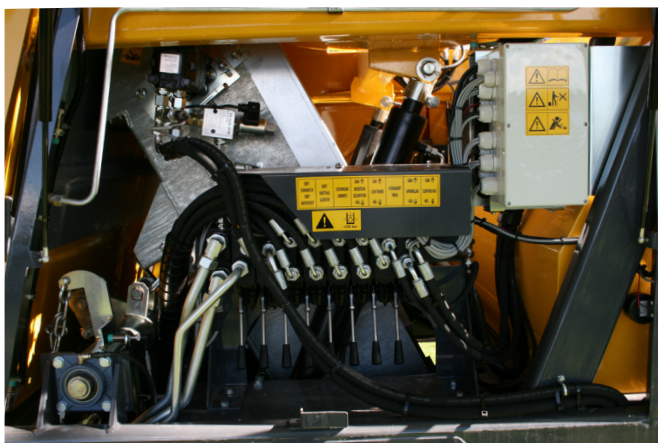

*The Broddson Nordic is a towed sweeper with large capacity, but it is at the same time very easy to operate. Additional equipment to meet the environmental standards of PM 10 is available for this model.*

*The Nordic has a 3,1 cubic hopper and a 2640 mm dump height, which facilitates service and maintenance. Articulated arms are part of the standard equipment.*

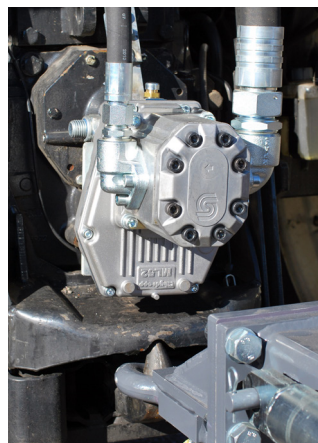

*It enables the sweeper to move sideways, which makes it easy to clean narrow passages.*

*The Nordic is also equipped with automatic relief valves and easy coupling and uncoupling.*

*Since all our sweepers are produced at our own premises, you can customize your sweeper according to your needs and also follow the production on site.*

*Hydraulic blocks and other delicate components are well protected, but also easily accessible whenever they need adjustment.*

*Quick and easy coupling and uncoupling.*

*Simple dump function.*
